## **Comma Continues Their Sustainability Journey by Moving to Post-Consumer Recycled (PCR) Packaging**

Comma are pleased to announce the implementation of Post-Consumer Recycled (PCR) plastic into our product packaging. When referring to 'PCR', PCR plastic refers to any type of plastic material that is made from post-consumer resins which have been recovered and reused from waste.

All Comma product bottles will now contain 35% PCR material content, meaning both less plastic and better plastic, whilst supporting our sustainability pledge to continually improve our business performance and environmental impact.

This implementation further supports the UK's Plastic Packaging Tax (PPT), which requires businesses to integrate a minimum of 30% recycled plastic, taking effect from 1<sup>st</sup> April 2022, and supports the UK's carbon saving initiatives.

The PCR bottles implemented have undergone rigorous testing and trialling, to ensure that the quality remains unchanged. We hope this move is one which resonates with our partners, and we look forward to supporting your business needs with a sustainably focused approach.

For more information surrounding the UK's Plastic Packaging Tax (PPT) and carbon saving initiatives, please visit the link [here](#).

Comma would also like to take this opportunity to welcome any feedback you might have, please contact a member of our Customer Experience Team at 01474 325 990 or via email: [sales@uk.moovelub.com](mailto:sales@uk.moovelub.com)

Best regards,

The Comma Team
